FAQs and Operation for PCMtuner V1.2.7 Update

Firstly, Many thanks to the users for their support and love for PCMtuner

After the 1.2.7 version update, all users need to download the PCM Suite installation package from the following website and install it.

Please download the PCM Suite installation package and install it from the website (<u>www.tuner-box.com</u>).

You can get the 1.2.7 version of the software. The picture is as shown below:

After downloading, unzip and install.

After installation

1. Double click the desktop to run PCMtuner Flash As the picture shows below:

2. Copy the machine code according to the software prompt, and send it to the mailbox (info@tuner-box.com).

Please send the machine code together with the serial number on the back of your PCMtuner hardware device to the mailbox to request the activation certificate in order to activate your PCMtuner Flash software. Usually the digital certificate will be returned within 30-40 minutes once we confirm that you are a legitimate user, from Monday to Friday during working hours.

The machine code on the back of the device is shown in the picture below.

3. Receive the tuner-box digital certificate and copy it to the folder (C:\Program Files (x86)\PCMtuner Flash). Do **NOT** modify the name of the digital certificate. The digital certificate name is shown as below.

名称	修改日期	类型	大小
W PCMtuner Flash	2022/8/8 20:44	应用程序	25,004 KB
PCMtuner.dll	2022/8/8 22:47	应用程序扩展	5,625 KB
🕮 PCMtuner	2021/11/1 19:02	图标	16 KB
PCMtuner.license	2022/8/3 12:38	LICENSE 文件	7 KB

As the picture shows:

4. Set the default opening method of the digital certificate to "PCMtuner Flash" as shown in the picture. o x _

5. Set the "Language", select English(United States) as shown in the picture.

6. It is best to set the display language to English. If your local language can work, you don't need to choose English as the display language.

1) My computer starts reading and writing after updating pemtuner 1.2.7, and it prompts that the PCMtuner Flash cannot be found(as the picture shows below). What should I do?

TUNER	100		
1			
ABARTH 1400 ML 200			
BGMK -		PCMtuner Flash not found Aceptar	
READ and WRI	G		
Version : 1.2	,		

Answer: Please go to the official website(Tuner-box.com) to download PCMtuner Flash.

2) My digital certificate has been obtained and placed in the corresponding directory. When I open the software, it keeps prompting me to send the machine code to the tuner box mailbox.

Answer: Please set the default opening mode of PCMtuner lincese to PCMtuner Flash as shown below.
